

Know what your school already knows.

Your school already owns a remarkable evidence base about every student: grades, observations, specialist reports, surveys. Evalent Intelligence gathers it into one living record that survives every transition, and turns it into briefings and owned, measured actions at every level of the school.

WHAT THE SCHOOL GETS

Handover briefs, every August

One per student, compiled from the record in minutes. No teacher starts September from zero.

Early warning with a year to act

Term 1 of Grade 11 read against each student's pre-DP baseline, with the likely explanation attached.

Evidence at the high-stakes moments

Predicted grade packs, reference briefs, and subject change evaluations, produced from three years of evidence.

Improvement you can point at

Every action has one owner, a metric with baseline and target, a review date, and escalation if it stalls.

FOR YOUR DPO

Roles

Your school is Data Controller; Evalent is Data Processor under a signed agreement. Hosted on AWS EU (Ireland), encrypted at rest and in transit.

Consent and retention

Consent recorded per student with provenance and expiry. Source documents carry retention tiers; deletion happens on schedule.

Identity, human-confirmed

Evidence is matched against the canonical roster; uncertain matches wait for human review. The system never guesses about a child.

Traceability

Every sentence of every brief cites the observations behind it. Superseded evidence marks dependent briefs stale for regeneration.

Pilot programme, a small number of schools through to early 2027.
